

A telehealth platform that connects patients with healthcare providers with integrations to more than 400 EHRs, scripts & payment mechanisms

CLIENT

Leading Hospital Group

INDUSTRY

Healthcare

COUNTRY DUBAI

BUSINESS PROBLEM

Our client was unable to function as Covid hit the globe and patients lost access to the outpatient practice of multiple specialists. The Hospital experienced severe loss of revenues during this period as the physical brick and mortar practices were limiting themselves to treating COVID affected patients.

SOLUTION

Our client was unable to function as Covid hit the globe and patients lost access to the outpatient practice of multiple specialists. The Hospital experienced severe loss of revenues during this period as the physical brick and mortar practices were limiting themselves to treating COVID affected patients.

Consult From Home

Book Appointment

Prescription Of Medication

Video Call With Doctor

Absence Form & Referrals

Second Opinion / Follow up

The solution offers the following integrations and features

| | | |
|---|---|---|
| EHR / EMR and ICD-10, CPT Integration | Absence Form Integration | Custom Push Notifications |
| Reports/Statistics and Population Health Data | Referrals to Super Specialists | Custom intake questionnaire that mirrors your in-office visit |
| Multi-Specialty and Multi-Location | E-Prescribe and Referral to Medical Tests | Custom patient survey collects feedback from your patients about your service |

The tech stack for the solution includes the below

| | |
|--|--|
| <p>3rd PARTY INTEGRATION</p> <ul style="list-style-type: none"> •WebRTC Video – HIPAA compliant Video Calling / Conferencing •How it is used – The original PHP SDK has been converted as a Module to work with the Yii framework. •This conversion has been done in such as way so that any new updates to their CORE can easily be upgraded. | <p>PCI Compliance and Credit Card fraud prevention</p> <ul style="list-style-type: none"> •Payment Gateway –All payments are done using the Authorize.net/Stripe •We built a highly secured API for the Payment Gateway SDK for our application to communicate within our server and it is pushed through our server’s SDK. |
|--|--|
