About Us

Kanini assists Healthcare Providers to transform digitally.

Healthcare has seen major disruptions in this COVID era. The last three months have seen Telehealth and Healthcare Analytics startups receiving major funds, as COVID played havoc with the brick and mortar care. With digital technologies, care providers have an opportunity to offer create additional revenues, reduce overall costs while improving patient experience.

Some of our Conversation AI Use Cases and ROIs

Capabilities

1. Consulting
2. Assessment Services
3. Business Intelligence Services
4. Product Engineering Services
5. Conversational AI Services
6. ServiceNow Deployments
7. Analytics Services
8. Intelligent Automation Services

Provider Solutions

1. HIPAA Compliance Assessments
2. ServiceNow Deployments
3. Automated Revenue Cycle Management
4. Telehealth Solutions
5. Supply Chain Analytics
6. Appointment Scheduling, Medication Management and EHR navigation
7. Transitioning to DevOps
8. Cloud Application Migration
9. Product Engineering Services

Payer Solutions

1. Payer Analytics
2. Provider Data Management Automation
3. Claims Management Automation
4. Automation of Member Enrollment
5. Population Health Analytics
6. Fraud Prediction Services

Use Case - Healthcare

HIPAA Compliance

The Health Insurance Portability and Accountability Act (HIPAA) sets the standard for sensitive patient data protection. Companies that deal with protected health information (PHI) must have physical, network, and process security measures in place and follow them to ensure HIPAA Compliance.

Pre-Certification

"Preauthorization" and "Precertification" refer to the process by which a patient is pre-approved for coverage of a specific medical procedure or prescription drug. Health insurance companies may require that patients meet certain criteria before they will extend coverage for some surgeries or for certain drugs. In order to pre-approve such a drug or service, the insurance company will generally require that the patient's doctor submit notes and/or lab results documenting the patient's condition and treatment history.

Pre-Authorization

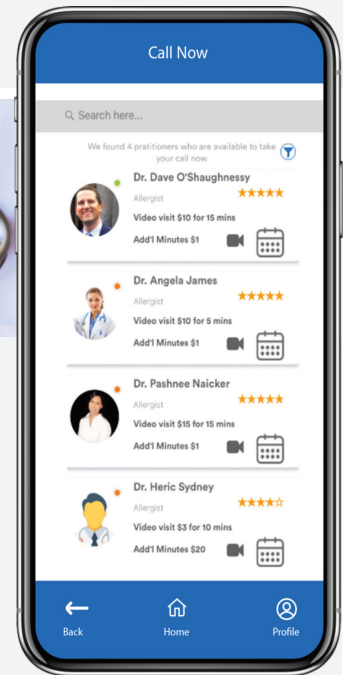

Missing Clinical Records Submission for Claim

Process Parameters are Member ID, Member DOB, Member Name, TAX ID, NPI ID, Service Date Range, Case Reference Number.

Kanini TeleHealth

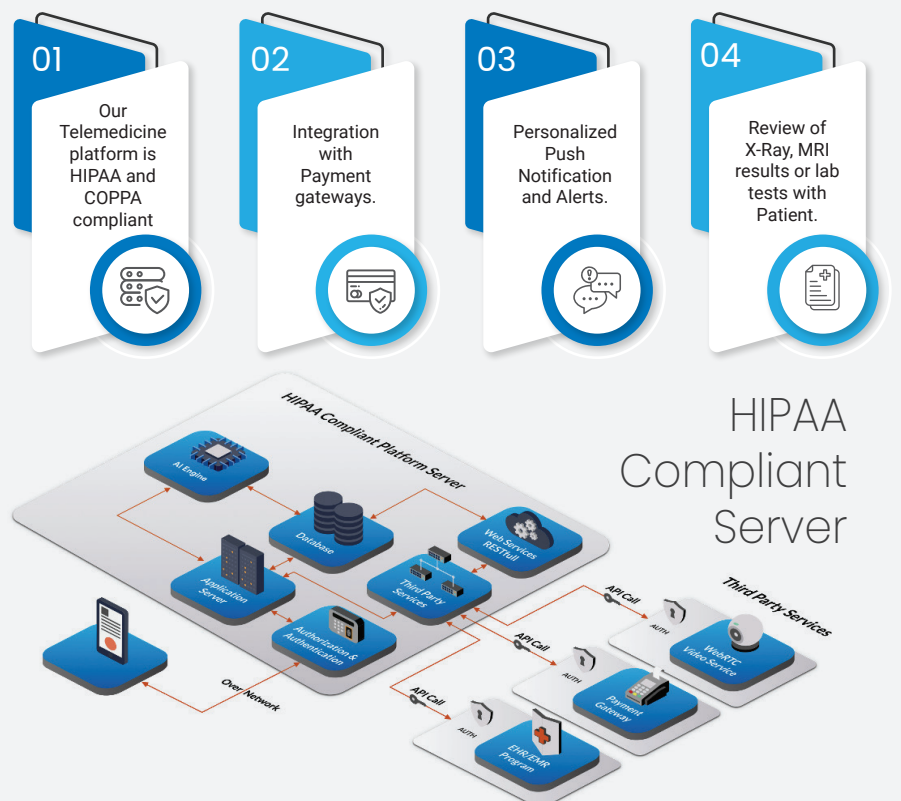

CMS Administrator Seema Verma shared, "telemedicine can never fully replace in-person care, but it can complement and enhance in-person care by furnishing one more powerful clinical tool to increase access and choices for Americas seniors. Telehealth platforms contribute to the virtual care needs that are evolving as complementary channels to the Brick and Mortar hospitals".

Kanini TeleHealth Solution is a Platform for Hospitals/Clinics. Our Platform supports and scales for all Healthcare Institution from Personal Clinic to Chain of Hospitals. We Support Multi Specialty and Offsite Doctor Consultation. Get Cross Platform App on Android. iOS and Web Browser.

What Does Kanini TeleHealth Offer

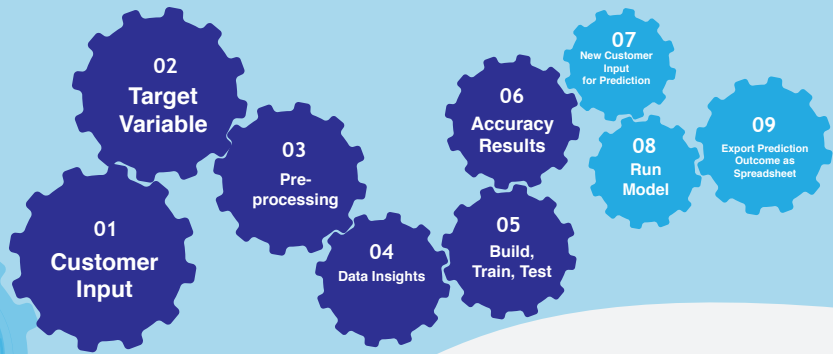

- EHR / EMR and ICD-10, CPT Integration
- Reports/Statistics and Population Health Data
- Multi-Specialty and Multi-Location
- Absence Form Integration
- E-Prescribe and Referral to Medical Tests
- Referrals to Super Specialists
- Custom Push Notifications
- Custom intake questionnaire that mirrors your in-office visit
- Custom patient survey collects feedback from your patients about your service
- Referrals to Super Specialists

ML360

for Healthcare Analytics

Our Approach

Benefits

- Pre-Built solution covering model training and accuracy results with historical data.
- Multiple Algorithm accuracy results provided (Linear Regression, Random Forest, Boosting).
- Easily scalable due to open source stack.
- Generic Solution which works for both Classification (Binary, Multi) & Regression Models.
- Generic Solution to handle not just once use case but can be used for multiple prediction use cases.
- Solution is transparent, no restrictions and easily customizable.
- Intuitive User Interface.
- Feature summary & visualizations.

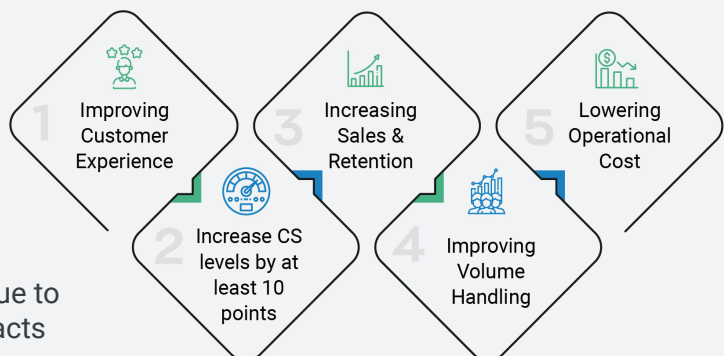

Conversational AI.

Our Differentiators

5x Increase in Insights from your contact center

5-10 Basis Points Improvement in NPS

30-70% Reduction in Cost due to automation of contacts

Artificial Intelligence Powered BOTS

Speech Recognition & Text-To-Speech

Transfer to Live Agent with Context

Uniquely placed to serve the market

Omni – Channel with User Tracking

ICR for Document Ingestion

Integration with API's
