Telehealth Solution Platform

Kanini Telehealth is the Patient Health and Telehealth Solution Platform for Hospitals/Clinics. Our Platform supports and scales for all Healthcare Institution from Personal Clinic to Chain of Hospitals. We Support Multi Specialty and Offsite Doctor Consultation. Get Cross Platform App on Android, iOS and Web Browser.

Kanini telehealth helps providers and patients

Kanini TeleHealth

Lorem ipsum

- Enhanced Care Delivery Model - Concierge of services, On demand
- Complete Workflow in Ambulatory Services / OP Visit - from Registration / Appointment / Questionnaire / Compliance Form / Waiting Room / Consultation / Prescription / Payment
- Asynchronous – Offline conversation / messaging with the results / symptoms – Value additions
- Multi Speciality Consultation

Telemedicine can never fully replace in-person care, but it can complement and enhance in-person care by furnishing one more powerful clinical tool to increase access and choices for Americas seniors. Telehealth platforms contribute to the virtual care needs that are evolving as complementary channels to the Brick and Mortar hospitals.

The image displays three mobile app screens for the Kanini TeleHealth platform. The first screen is the home dashboard for Dr. Heric Sydney, showing notifications, appointments, and call history. The second screen is a questionnaire for Mrs. Rachel Greene, asking for the reason for visit and symptoms. The third screen is a post-consultation form for Amelia Smith, showing prescription details.

Functionalities & Features

01

HIPAA and
COPPA
compliant

02

Integration
with
Payment
gateways.

03

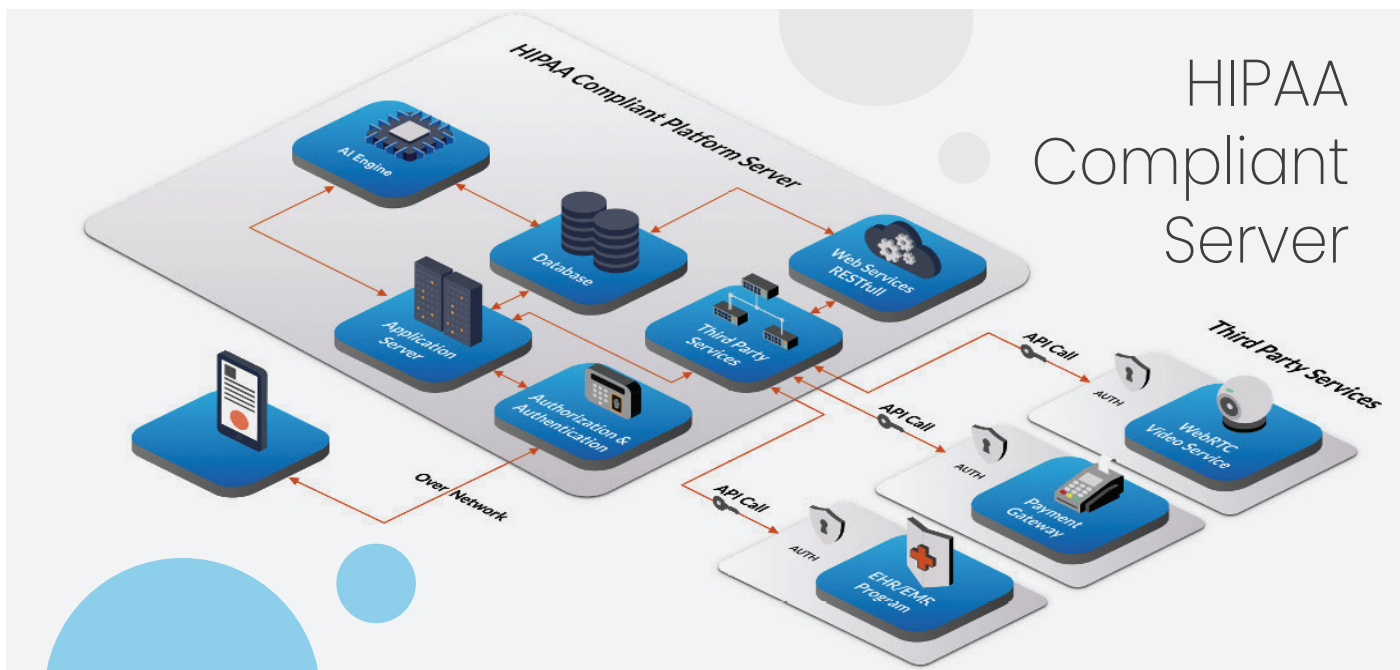

Personalized
Push
Notification
and Alerts.

04

Review of
X-Ray, MRI
results or lab
tests with
Patient.

Case Study

Leading Hospital Group

Problem

Our client was unable to function as Covid hit the globe and patients lost access to the outpatient practice of multiple specialists. The Hospital experienced severe loss of revenues during this period as the physical brick and mortar practices were limiting themselves to treating COVID affected patients.

The Solution : Integrations and Features

| | |
|---|--|
| EHR/EMR, ICD-10, CPT Integration | Referrals to Super Specialists |
